

## Italstyle Stype

**Italstyle Yacht Design has just unveiled the Stype tender project. It's a new 13m tender with an appearance that they modestly describe as "innovative and unusual".**

The Stype is designed as a concept for luxury megayacht buyers. The sides are angular and punctuated by glass while the swimming platform is kept as low as possible to create a "pool-side effect". Its 800hp will carry 12 people to around 40 knots in the classic comforts of Burma quality teak and "ultraleather" upholstery.
